They included an "insignificant drop" in the price of sorghum and financial aid to increase dairy efficiency, the funds to come from the Development Budget. Another case in point is the Habimah Theatre, which by its efforts over thirty-five years, has won for itself a position in the eyer of the Israel public parallel to that of a national theatre. But it is not a State Theatre and today indeed it stands at the crossroads. It has to decide whether it will go "commercial" in an attempt to compete with younger theatres or whether it will follow a path of presenting classics and works of national significance. To do the latter must imply a considerable measure of Government support and public encouragement.

The need for some form of national supervision in painting and sculpture is also becoming very evident if exhibitions which leave this country are to be properly planned and selected Such abody might, for example, arranze for the display at important world centres of the best of our plastic arts. Rubin's retrospective show is attracting large and anthuniastic crowds in Tel Aviv. An Academy of the Arts, if it were set up, would not only weigh the salvantages of sending this exhibition on tour but would also prevent the export of works less likely to enhance Israel's reputation.
